

Annals of Physical and Rehabilitation Medicine (APRM) is a scientific journal **created in 2009** from the existing *Annales de Réadaptation et de Médecine Physique*. It is published in English and covers all fields and aspects of Physical Medicine and Rehabilitation, from fundamental, to medical and social sciences related to rehabilitation, with a special interest in translational research. Annals of PRM is published in association with the International Society of Physical and Rehabilitation Medicine (**ISPRM**) and with the European Society of Physical and Rehabilitation Medicine (**ESPRM**). This is also one of the Official journals of the Physical and Rehabilitation Medicine section of the European Union of Medical Specialists (**UEMS**) and the official organ of the **Société Française de Médecine Physique et de Réadaptation (SOFMER)**.

Publication in the Annals of PRM is free of charge. An international editorial board and a panel of reviewers, all well recognized in their respective fields, help authors improve the quality of their papers. The editorial process is kept as short as possible: the mean time to reach the first decision is **30 days** for manuscripts submitted.

The Journal is indexed in **MEDLINE, SCImago**, and the **Web of Science** (core collection since 2017). It has one of the strongest increase of the number of citations in the field, with a first Impact Factor this year (**IF 2017 likely over 2.5**). **Downloads** are also increasing sharply, multiplied by 4 in the 5 last years, and **reaching 600 000 in 2017**. The strongest growth are obtained in North America and Australasia.

All editors (<https://www.journals.elsevier.com/annals-of-physical-and-rehabilitation-medicine/editorial-boardEditors>) are happy to serve on the network of PMR journals.
